

This luxurious residence boasts stunning views of the water, and we are proud to have been able to deliver such an exceptional property to our clients.

We are thrilled to have recently completed an incredible penthouse build in the heart of Sydney's beautiful Walsh Bay.

The process of building this penthouse was an incredible journey, from the initial planning stages through to the final touches and handover. As experienced Sydney home builders, we take pride in our attention to detail and ability to deliver exceptional outcomes, and this project was no exception.

2022 PROJECT WALSH BAY

From the outset, we worked closely with our clients to understand their vision for the penthouse and to ensure that every detail of their dream home was incorporated into the design. We collaborated closely with the architect to ensure that the design was feasible, and we worked tirelessly to source the highest-quality materials and finishes to bring the vision to life.

One of the key challenges of this build was the location. Walsh Bay is a bustling and busy area of Sydney, and the penthouse is located on the top floor of an apartment building with limited access. We had to carefully coordinate all aspects of the build to ensure that we could work safely and efficiently, without disrupting the surrounding area or causing any damage to the building.

To surmount these obstacles, we created a detailed plan for the construction and collaborated closely with our team to make sure that everyone was on the same page and focused. We took great care to make sure that all work was completed in accordance with the highest safety standards, and we made sure that we kept all stakeholders informed plainly at all times.

The use of high-end finishes and fixtures throughout this penthouse is one of its most notable features. Every aspect of the construction, from the marble benchtops to the upscale lighting fixtures and custom-designed cabinetry, was meticulously planned and flawlessly carried out.

We collaborated with some of the best tradespeople in the industry to accomplish this level of finish. We worked closely with our team of skilled carpenters, plumbers, electricians, and other specialists—all of whom were carefully chosen for their expertise and experience—to ensure that every element of the construction was of the highest calibre.

Overall, our crew at 4x4 Built had an amazing time building this penthouse in Walsh Bay. We think this project is a testament to our commitment to quality, excellence, and innovation. We are pleased to have been able to provide our clients with such a remarkable property.

Build it your way
